

## CHURCH NOTICES AND ACTIVITIES

### CHURCH NOTICES FOR MAY 19th & MAY 26th Sunday, May 19th, 1929

Services at—  
Ross — 11 A.M.  
Alma Mater — 2 P.M.  
Roseberry — 3.30 P.M.  
Irma — 8 P.M.

The service at Irma will be a Confirmation and Consecration service. Those joining the church by letter will be officially welcomed and those uniting on profession of faith will be received into full communion and have their Baptismal Vows Confirmed.

Sunday, May 26th, 1929  
Strawberry Plains — 11 A.M.  
Alma Mater — 3 P.M.  
Irma — 8 P.M.

**Empire Day Services**  
Patriotic music. This is Conference Sunday and the pastor will be absent. Come prepared to unite heartily in the singing and encourage the preacher by your prayers, sympathy and spirit of worship.

Mrs. S. S. Reeds, Mrs. Thos. Shaw and Mrs. M. L. Wright will attend the W. M. S. Conference at Calgary which meets May 21, 22 and 23d.  
Mr. James Fonten and Rev. M. L. Wright will attend the Alberta Conference of the United Church which meets in Central United, May 22 to May 29th.

On Conference Sunday Mr. Wright will preach in Tuxedo Park and Mr. J. W. Bainbridge of Viking at Springbank according to Conference program.

Mr. G. W. Campbell of Viking received a telegram from Toronto saying that Wainwright Presbytery had won out in the competition for new subscriptions to the Church paper "New Outlook", and that Mr. Campbell, as representative of the Presbytery was entitled to a trip to the Eastern Coast on the New Outlook Special. Mr. Campbell, besides being an interested and active church worker, is an enthusiastic Free Mason, well-versed in its ritual and Constitution.

His Masonic brethren will unite with the members of the United Church in the Wainwright Presbytery in congratulating him.  
The Mother's Day services both at Alma Mater and Irma were well attended. The Alma Mater services were brightened by a song by the school children and a solo by Miss Violet Renwick, and Mother's Day recitations by Gwen Burton, Neil McMillen and Phillip Inken.

At Irma the church was beautifully and appropriately decorated by Mrs. Renwick who proved herself a real artist in the way of decorations. The music, by the choir and the solo by Mrs. Wright as well as the pastor's address were all adapted to the occasion.  
Phillip Inken who had already taken part in two other services, drove in through the rain and gave a recitation.

### ANGLICAN CHURCH

A service will be held in the Masonic Hall, Trinity Sunday, May 26th at 11 A.M.

Will all who feel they could help in the singing attend a choir practice at the home of Mrs. Pryce Jones on Saturday evening, May 25th at 8 p.m.

A. M. Trendell, Vicar Wainwright  
The Anglican Woman's Auxiliary will hold a Whist Drive in the Masonic Hall, May 31st. Admission 50c. Everybody welcome.

The next meeting of the W. A. will be held at the home of Mrs. Fred Higginson, the 2nd Tuesday in June.

### NOTICE

Irma, Alta., May 1st, 1929  
The Editor,  
The Irma Times,  
Sir—

I wish to announce through your columns that Dr. B. C. Armstrong, a specialist in tuberculosis will visit Irma on May 21st for the purpose of examining ex-Sanatorium patients and their families. Any others who have been in contact with tuberculosis patients are invited to avail themselves of Dr. Armstrong's examination, which is free.

Anyone wishing to be present should get in touch with me at once.  
Yours truly, W. Barr Murray, M.D.

## NEWS ITEMS FROM KINSALLA

H. L. Cooper shipped a car load of mixed stock from Kinsella Monday of this week.

Several fires got away last week and developed into serious prairie fires, which have done considerable damage. A number of buildings have been burned to the ground, including one of the new H. B. Company's houses, erected last fall, situated south east of Kinsella.

Investigations are under way and it is hoped that more can be taken in fireguarding, etc., to safeguard the public from this very serious menace before fires are started.

Owing to the dry nature of the ground and grass this spring, these fires have been very difficult to get under control.

We are glad to report that most of the many cases of scarletina of the past week, in the town and district, are improving nicely and it is hoped that the disease is now declining. Several homes are still under quarantine.

With the Scarletina now in check, the Kinsella school, which on that account was closed, has re-opened.

The U.G.G. elevator here had air dumps installed on their scale last week.

Mr. West Horner is in the district, doing a few plastering jobs. He has finished the Overleigh school house, and is now busy putting in a cement floor in the basement of the United Church at Kinsella.

The Overleigh school is now finished, with the exception of a little finishing work to be done on the interior and will be ready for occupancy in a few days.

Wm. Sommerville has sold his farm south of Viking and has purchased the Ross Phillippe's farm north east of Kinsella. He is at present busy moving his farm equipment to his new home.

The first farmer to own a stubble burner in this district is Thom Woods. Mr. Woods recently purchased one from E. C. Williams, machine agent. The British American Oil Co., have completed the erection of a warehouse just west of the stock yards. Mr. J. F. Murray is in charge.

Mr. Orin Watson is seen driving a new Ford Sedan recently purchased from McAtthey & Jones of Viking.

The Kinsella gravel pit is again going at full swing. The usual large gang of men starting working there this week.  
Friday of last week there were twelve families arrived at Kinsella from England, to take possession of their new homes erected by the Hudson Bay Co.'s last fall in this district. Horses were also shipped in by the Company and on Saturday each family was given a team of horses and a wagon and was assisting in loading up by H. B. Co's supervisors, all left for their different farms before night. The women and children being taken out in autos by the men in charge.

Considering everything being very strange all went smoothly, with the exception of a couple of runaways. Luckily no one was hurt.

We are glad the welcome these new settlers to our district, and wish one and all good luck in their new venture.

### APRIL REPORT FOR LEWISVILLE SCHOOL

Grade VIII.—Thelma Saville, average 70.67, Louis Voros 60.2.  
Grade VI.—Harry Saville 78.1, Margaret Skoze 70.4, Pearl Rubenok 63.2.  
Grade V.—James Saville 64.1, Elmer Skogg 58.5.

Grade IV.—Frank Voros 51.  
Grade II.—Vera Voros 85, Kathleen Saville 89.

Grade I Sr.—Doreen Saville 97, Margaret Voros 94.

Grade I Jr.—Della Cotton, average very good, George Voros, good. (Miss) N. A. Pavey, Teacher.

### FRIDAY, MAY 24th IS A DOMINION HOLIDAY

Friday, May 24th being a national holiday, will be observed in Irma. The school, bank and business places will be closed. Do your shopping on the 23rd.

### CHEAP FOR CASH

For Sale, 6 Hole Steel Range, high back with reservoir.—E. Sharkey, Irma. 3-tp.

A concert will be given at the theatre in the evening by the winning contestants. Admission, 50c; children, 25c.

## NEWS ITEMS FROM JARROW

The regular meeting of the Community Club was held on Monday evening. Not such a good crowd as usual attended but a very good time was had by all. Cards were the order of the night and after playing 500 a most delicious lunch was served. Mr. and Mrs. Meakins with Mrs. Marbury and W. Mathews were the entertainers. The next meeting will be on May 20th and will be in charge of Mr. and Mrs. Miller and Mr. and Mrs. Orr.

A very quiet wedding was held in the United Church here on Tuesday afternoon at three o'clock when Mrs. Davidson and Mr. A. J. McKay, both of Edmonton were married by Rev. A. O. McNeil. Mr. and Mrs. McKay left on the afternoon train for Edmonton where they will reside.

A very disastrous fire occurred on Wednesday evening when H. McGuire's house and contents were burned. The origin of the fire is unknown as Mr. McGuire was in town and absolutely nothing was saved.

A large number from here attended "Ramona" in Irma on Wednesday night.

A social evening and shower was held in the Batts school house in honor of Mr. McNeil and his wife. Some beautiful gifts were received and a very pleasant evening spent.  
The P. A. Girls Club held a very pleasant meeting on Tuesday evening, at the home of Mrs. Miller. Games and contests were the order of the night and a most delicious lunch was served by the hostess.

On Friday evening, May 10th the members and adherents of the United Church gathered together in the Church for a social evening and a reception to Rev. and Mrs. McNeil. A program of music, games and contests was enjoyed. Mr. Waite then presented Mr. and Mrs. McNeil with a beautiful tray of community plate silver from the congregation, and a wool comforter from the Ladies Aid. Mr. and Mrs. McNeil thanked the people in a few well chosen words. Lunch was then served and a very pleasant evening brought to a close.

Mr. and Mrs. Bamsey motored to Wetaskiwin on Sunday and brought Mr. Bamsey's mother back with them. Mrs. Barton returned home on Monday after spending a month with relatives in Moosomin, Sask.

Plans are being made for a bigger and better Sports Day on June 3rd. Mr. and Mrs. Posten, of Heath, spent Sunday and Monday with their daughter Mrs. B. McDougall.

Mrs. Ellis of Calgary visited with her mother, Mrs. Marshall last week. Mr. and Mrs. Manners and children of Gadsby also visited at Mrs. Marshall's Sunday. Mr. Manners returned home but Mrs. Manners and little son Billy are staying the week with her mother and renewing old acquaintances in town.

Mother's Day services were held in both Sunday School and Church on Sunday. Both were largely attended and the special music and program was enjoyed by all.

Now is the time of the year to advertise for those stray horses and cattle. A small ad in this paper will help you.

### LOCAL OPTION VOTE JUNE 12th

On June 12th the residents of Irma will be given a chance to decide if it is their wish to have a license for a beer parlor issued in the village of Irma. To date very little interest has been taken in the coming plebiscite but before the date for taking the vote there will likely be considerable interest shown on both sides.

### NOTICE

Will the residents of Ross district please note that I have made no statement as to how the prairie fire west of the school, last Friday, was started. It started some time between one p.m. and two-forty p.m., when it was noticed by the school children. Much blame has been placed upon William Nash, but he is in no way guilty. He was playing ball with the bigger children on Friday.

It commenced right at the side of a cross road on the section west of school, so it probably started from someone passing dropping a lighted cigarette. — Alma G. Miles.

In July 1928 Sam Bugarsky, a prosperous barber and small fruit farmer of Forest Grove, Oregon, was lured to Irma district to look over C.P.R. land where E. McDowell showed him \$150.00 per acre land. Mr. Bugarsky sampled some wheat in a nearby field and openly admitted it was the best wheat he ever saw in stock. He immediately procured the South half of Section 27-46-9-wth, returning about a month ago he purchased the West half of Section 33-46-9-wth. Leasing this section to Sherman Prosser for three years he furnished him a John Deere tractor, brush breaker and 10 foot disc, also funds to buy oil and gas. Mr. Prosser expects to put about 800 acres ready for drill next spring.

Seeding is practically finished in the Irma district. A few farmers have small acreage of oats or greenfeed to finish. The wheat is coming up nicely and many fields are beginning to cover the ground. It has been hard to make an estimate of the acreage of wheat sown but most farmers have from ten to twenty five per cent more wheat than last year. A lot of brush has been cut and this summer will see a lot more new land broken and put in shape for cultivation.

### GOLDEN WEST CHICKS

12 Chicks Free with every hundred Barred Rocks or Leghorns ordered in June. Thousands of Barred Rocks \$19.00; White Leghorns \$18.00, hundreds of Reds and Wyandottes \$20.00 per 100. One hundred per cent Guaranteed Alive. Pure Bred-to-Lay. Order direct from this ad. Send for Catalogue. SASKATOON HATCHERY, 424-1st Ave, North, Saskatoon.

Heard on the street in a neighboring town: "Your wife has run away with the chauffeur." "Oh, well, I was going to fire him anyway."

"I hope you keep your cows in a pasture?" said a recent bride here to the milk man the other day. "I do, but what difference does that make?" he asked. "I've been told that pasteurized milk is the best," she replied.

## M.D. BATTLE RIVER COUNCIL MINUTES

Councillors of the Municipal District of Battle River No. 423 met in Council room, Members present, Messrs. Smallwood, Burton, Santee, Burrell and Vesey.

Minutes of last meeting were read and on motion of Mr. Santee were accepted as read.

Moved by Mr. Burton that petition for herd by-law in Division 5 be accepted. Cd.

Moved by Mr. Burton that the number of ratepayers necessary on a petition to bring herd by-law to a vote in division 5 be set at 20. Cd.

## Radio—An Agency For Peace

The settings now being held by the Royal Commission on Radio appointed by the Dominion Government to study the whole question of broadcasting, and make report to the Government as to best policy for Canada to adopt in the national interests of the whole Dominion, is having the effect of directing attention from the purely local and entertainment features of this latest of great modern discoveries and causing people to appreciate more fully the tremendous possibilities of aerial communication, both in a national and international sense.

While undoubtedly there is a feeling of regret in Canada that, because of natural causes, it is much easier for people in Western Canada to "listen in" on stations in the Central Western States than it is to "get" stations in Eastern Canada, and for Eastern Canadian listeners to receive the programmes broadcast from New York, Philadelphia, and other Eastern United States cities than it is for them to "tune in" on Western Canadian Stations—a condition for which it is hoped the present Radio Commission can find some solution, the fact remains that a closer community of interest between Canada and the United States, and consequently a still better understanding, is being developed by means of the radio. And community of interest and understanding is the greatest of all bulwarks to Peace.

But to many in this country it will come as a welcome surprise to learn of the great strides made by radio in Europe and the effect it is having in promoting greater understanding among the diverse nationalities and languages of that war-afflicted continent. It is almost inconceivable that within less than eleven years of the signing of the Armistice ending the Great War, the radio should be used in Germany and England to teach the people, not merely school children but adults, the French language; that international "hook-ups" of Germany, Poland, Austria, Hungary, France, and other countries are being regularly carried out, so that people in Paris and Warsaw can listen to German concerts in Berlin and Hamburg, and the German people can enjoy the opera in Paris, or a great symphony orchestra in Vienna or Budapest.

There are some good people in Canada who still retain the old fashioned idea that it is unparliamentary, and liable to undermine British institutions in this country, if children are taught in our schools to speak and read French, German, or any language but English. In entertaining such ideas Canadians are far behind the times; they are not nearly so far advanced as they are in England and other countries where the learning of foreign languages is compulsory. If every Canadian child, whether of British or French descent, was obliged to learn both English and French, Canada would in a generation become more powerful, influential and prosperous. It would open to our people the rich literature of both races; it would give us greater prestige among all nations; it would help to promote our export trade in all the markets of the world. In this Canada, by reason of its two great races, has an opportunity no other nation enjoys, yet we are not only neglecting it, but many people urge that it would be disloyal to our British connection to encourage it. Yet Britain herself is doing it.

It is predicted that within three years, five years at the most, Canadians will, through the development of national broadcasting at home, and the use of the beam system of wireless across the ocean, be able to sit in their homes and "listen in" on the finest programmes in the world broadcast from London, Paris, Berlin, Vienna, and other European centres of culture, art and music.

We can now speak with Europe by telephone from the heart of Canada's prairies, and the day is fast approaching, so those in a position to know authoritatively state, when by radio we will be in more or less constant communication with Europe, receiving the best they have to offer in public addresses, vocal and instrumental music, and the important news of the day. In turn, Canada will be brought equally close to them. And, in all probability, "seeing" Europe and European happenings through the instrumentality of the radio will more or less rapidly follow "hearing," just as, in reverse order, the "talking" picture has followed the silent movie.

And these things are all to the good, in the cause of world peace. As we know people and understand them our prejudices and suspicions are removed. We learn they are human just like ourselves; that they have high ideals and are inspired by lofty motives; that they love the things we love, and hate the unclean, the ugly, the vicious, just hate them. As we come to understand their problems, difficulties and aspirations, and they come to understand ours, mutual sympathy will develop, followed by a desire for co-operation, rather than antagonism.

It is only so, through mutual understanding, that permanent world peace can be maintained and the maximum of true progress be made.

## Cuticura Heals Face Disfigured With Itchy Pimples

"I had pimples all over my face. They were hard, sore and red and some of them were large and ugly. Some of them festered and scabbed over, and itched and burned causing me to scratch. Scratching caused eruptions and the irritation prevented me from sleeping. They disfigured my face for many weeks. I used different remedies without any results. I began using Cuticura Soap and Ointment and it was only a few weeks before my face was completely healed, after using two cakes of Cuticura Soap and one box of Cuticura Ointment." (Signed) Miss Harriet Hamilton, Box 772, Yarmouth, N.S.

Make Cuticura Soap and Ointment your every-day toilet preparation, and have a clear, sweet skin, soft, smooth hands and a healthy scalp with good hair.

Box 30, Montreal 25 and the Telegram Co., Ltd. Montreal 25, Canada. Cuticura Shaving Stick 25c.

## Measuring Lightning Flash

No Part Of It Ever Lasts For Appreciable Time

A lightning flash takes about one-seventh of a second to complete itself and no part of it lasts more than approximately one-thirtieth of a second. This is the first time in history that the speed of a lightning flash has been measured. It has also been proved that lightning starts from the clouds and the ground at nearly the same instant, and approximately one-seventh of a second later the two ends unite in mid-air. These facts were determined by Dr. C. U. Boys, a British physicist, who has been attempting hundreds of photographs for the last twenty-six years, until a stroke of lightning in New York at last gave him this information.

## Northern Air Ports

Settlements In Northern Manitoba To Have Air Mail Service

Manitoba's northern settlements of Oxford, Godland, and Island Lakes will be added to the growing chain of northern air mail points of call. Hon. P. J. Veniot, postmaster-general, announced in the House of Commons.

Mr. Veniot stated that arrangements had been completed for the conveyance of mail to and from these northern points once a week by aeroplanes of the government forestry patrol at Norway House, at the north end of Lake Winnipeg.

## RHEUMATIC PAINS

Cannot Be Rubbed Out—The Trouble Must Be Treated Through the Blood

The pain of rheumatism is something that you cannot rub out. Every sufferer from rheumatism has been advised to rub this or that liniment or oil on the affected part, but after all the rubbing the pain remained. Thin blood and rheumatism come together and if they are properly treated will go together. Anemia means thin blood, and thin blood is something that can be corrected, so why not build up the blood until the rheumatic poisons are driven out?

This is exactly what is done in the treatment of rheumatism with Dr. Williams' Pink Pills. Rheumatism in any form shows improvement as the thin blood is built up, and when the poisons in the blood are overcome and driven out rheumatism disappears and does not return so long as the blood is kept rich and red. The great value of Dr. Williams' Pink Pills in the treatment of rheumatism is proved by the case of Mr. Thomas Martin, of Nova Scotia, who says: "For some years I was so badly troubled with 'rheumatism' that I could hardly walk and suffered great pain. I had medical treatment but did not get much relief. Then I decided to try Dr. Williams' Pink Pills, and after taking the pills for some time the trouble disappeared and has not since shown the least sign of returning."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**Pedigreed Hatching Eggs**  
A record shipment of pedigreed White Leghorn hatching eggs was made recently by the Poultry Breeders' Association of British Columbia to a hatchery at Petaluma, California. The shipment consisted of 36,000 eggs valued at \$5,000.

themselves, conform to the economic law of diminishing returns. The Canadian Government, accordingly, has had for a main object the prevention of depletion, the enforcement of close seasons, the forbidding of obstructions and pollutions, and the regulation of nets, gear and fishing operations generally. In addition, an extensive system of fish culture has been organized, the Dominion operating 25 main hatcheries, 6 subsidiary hatcheries, and 4 salmon retarding ponds in 1927.

Minard's Liniment for cuts and bruises.

**False Economy**  
There are not many people who would die of starvation rather than dig into their savings, but we often see men who do not know how to enjoy their money. They save by denying themselves the natural pleasures of life and in the end are forced to leave their money to people who never helped to earn it.

At 452 degrees below zero some metals, such as silver and copper, lose their resistance to electricity, becoming superconductors.

Smile—Her face was like five miles of detour.

Minard's Liniment—good for tired feet.

## Illness Kept Her From Work

"I took Lydia E. Pinkham's Vegetable Compound because I was so sick every month that I had to keep my bed for two days and I suffered so that I felt badly all the time. I had been working in a factory but for a long time was not able to work as I was so run-down and nervous. My friends told me of the Vegetable Compound. I am now sound and well and have gone back to work. I have a good appetite, my color is good and I am in good spirits." Evelyn Bouquet, 432 Alameda Street, Montreal, New Brunswick.

Lydia E. Pinkham's Vegetable Compound

Lydia E. Pinkham Medicine Co., 1234 Main St., N. B. and Canada, Ontario, Canada.

ADOZEN different things may cause a headache, but there's just one thing you need ever do to get immediate relief. Aspirin is an absolute antidote for such pain. Keep it at the office. Have it ready in the home. Those subject to frequent or sudden headaches should carry Aspirin in the handy pocket tin. Until you have used it for headaches, colds, neuralgia, etc., you've no idea how much Aspirin can help. It means quick, complete relief to millions of men and women who use it every year. And it does not depress the heart.

## New Death Dealing Ray

Electrical Driver Recently Invented Develops Three Million Volts

H. H. Nelson-Smith, engineer on the staff of the Pacific Gas and Electric Company in San Francisco, said a "death ray" device had been invented by J. B. Martin, electrical engineer of San Francisco. The new device, he said, was capable of developing three million volts.

The Martin machine, Nelson-Smith stated, is housed "somewhere in San Francisco," but its exact whereabouts is being kept secret. The invention has been working in co-operation with the electric company.

"Anyone who got in the path of the ray would be instantly snuffed out," the chemical composition of his body would be changed and the life cells disintegrated," he said.

**Praises This Asthma Remedy.** A grateful user of Dr. J. D. Kellogg's Asthma Remedy finds it the only remedy that will give relief, though for thirteen years he had sought other remedies, is housed "somewhere in San Francisco," but its exact whereabouts is being kept secret. The invention has been working in co-operation with the electric company.

## Discovers Hungarian Tribes

Historian Finds Ancient Settlement In Heart Of India

Professor Stephen Gufard, archaeologist and historian, has returned from a 12-months exploration trip in India and announced that he had discovered two Hungarian tribes in the heart of that country. He said they were named Mar and Marva.

He also said that he had found the ruins of an ancient palace, together with manuscripts, statues and ceramics which proved that the palace belonged to Huns.

These tribes, the professor said, were descendants of Magyar nomads who left their homeland to conquer Europe with the army of Attila 1,100 years ago.

## B.C. Salmon Pack

The position as regards the salmon pack of British Columbia is improving under present conservation methods. The 1928 pack is now reported at 2,035,637 cases, which is only 29,561 cases lower than the record pack of 1926. The pack of pinkies totalled 792,262 cases, or 19,269 cases more than the 1926 record.

Miller's Worm Powders can do no injury to the most delicate child. Any child, or infant in the state of adolescence who is infested with worms can take this preparation without a quiver of the stomach, and will find in it a sure relief and a full protection from these destructive pests, which are responsible for much sickness and great suffering to legions of little ones.

The Teacher—You have failed in geography again.

Robbie—No! You only said to me did I know the capital of Minnesota and I said I didn't, which was true.

Worms cause fretfulness and rob the infant of sleep, the great trouble-maker. Mother Graves' Worm Expeller will clear the stomach and intestines and restore healthfulness.

From July 14 to 17, 1911, 8,815 inches of rain fell at Baguio in the Philippine Islands. More than 35 inches fell on one day.

Neuralgia succumbs to Minard's Liniment.

## Attractions For Tourists

Vast Extent Of Canada Offers Visitors Interesting Holiday

Canada has a million square miles of forest, countless lakes and thousands of miles of rivers and brooks, providing the finest hunting, fishing, canoeing and camping. The vast extent of Canada and the diversity of conditions in different sections make it difficult for the prospective visitor who is not familiar with the country to decide which particular section interests him most. To overcome this the Department of the Interior has published "Vacations in Canada," a 96-page handbook which sets forth the attractions which Canada offers to tourists and sportsmen. This booklet describes the tourist attractions of each region in the Dominion—the climate, the motor roads, the points of historic interest, the fishing, hunting, canoeing and camping, the principal cities and the popular summer and winter resorts. In addition it gives a summary of the Canadian Customs regulations. "Vacations in Canada" is distributed without charge, from the Natural Resources Intelligence Service, Department of the Interior, at Ottawa.

## Wins Oratorical Contest

Marcelle Brunet, 17, of Norwood, Man., representing the French-speaking schools of the province, won the Manitoba oratorical contest the other day. She was opposed by ten entrants from English-speaking schools in the final match. Miss Brunet will represent Manitoba in the Canadian oratorical finals. She attended convent at St. Adolphe, Man.

## Sore Corns Drop Off If You USE "Putnam's"

When you notice any sign of callosity on the feet or toes—that's the time to paint on a few drops of PUTNAM'S CORN EXTRACTOR. Do this, and you prevent corns. No matter if the corn is hard or soft. Let it be on top or between the toes. Putnam will remove it without pain. Insist on PUTNAM'S CORN EXTRACTOR. It does the work—and roots out the corn, quickly and without pain.

## Health and Motor Accidents

Men with high blood pressure should use extraordinary care in driving automobiles, according to recent experiments conducted by psychologists of the personnel research department. These experiments, showed a definite relation between health and motor accidents. Men with high blood pressure were found to have more than twice as many accidents as those with normal pressure.

No surgical operation is necessary in removing corns if Holloway's Corn remover be used.

Forty automobiles can be driven abreast at low tide on the beach of Jacksonville, Fla. The sand is as firm as on a paved street.

Minard's Liniment relieves pain.

Einstein should make a good train caller or bellhop, as nobody can understand what he is talking about.

## Grain Commission Discovers Many Matters That Should Be Rectified To Good Advantage

The appointment of the Saskatchewan Commission of Inquiry was the result of accumulating complaints and of a combination of circumstances last fall. Wheat was down in price, the yield and quality of the grain in a large part of Saskatchewan had suffered on account of frost, and there was stricter grading with a view to protecting the reputation of Canadian wheat in the export market. Increasing complaints culminated in a demand for the reorganization of the Board of Grain Commissioners, and the same demand was heard in Alberta and Manitoba. With a view to getting the facts and clearing up the situation as far as possible, the Saskatchewan Government appointed the commission of inquiry.

There have been many commissions appointed by the provincial and federal governments to investigate the handling of the grain. They have all suggested improvements, and an incidental result has been the education of the farmers on the grain question through reading the evidence taken and the reports made by the commissions. While there may be a great deal of mis-understanding among some of the farmers, there are others who have an intelligent grasp of their own business that is not surpassed by that of the farmers of any other country. Improvements in the methods and system of handling the grain are, also, constantly discussed by the committee on agriculture at Ottawa, and a great deal has been done in past years toward protecting the interests of the farmers.

The present commission in its interim report, finds many matters that it thinks should be rectified, and it entirely agrees with the complaint of the farmers that the Grain Board is too far removed from them. The Board is in a remote place for good service in many ways, and it is recognized that it was hampered by the conditions under which it was working. Under the Grain Act, its headquarters were at Fort William, and it had an inadequate staff of inspectors to deal with complaints throughout the West, apart from the question whether a board of three commissioners could properly cover so wide a field. The commission recommends the enlarging of the board, the locating of the head office in the West, and the Board thinks best, and the maintenance of offices at Fort William and Vancouver and in each of the Prairie Provinces, with enough inspectors to deal adequately with complaints. The personal factor in the supervision of the handling of the grain is stressed by the commission. It urges the selection of well-qualified men for the Grain Board, with the Chief Commissioner a man of outstanding ability. Increasing the remuneration of inspectors to prevent so many being drawn off by the pools and by private companies, thus lowering the efficiency of the staff, is recommended. And it is proposed that elevator agents throughout the West should be licensed, with power to the Grain Board to cancel licenses, in order to have better assurance of the competence and reliability of the men receiving the grain at the elevators. The report states that while most of the agents are satisfactory, there are some who are not, and should not be engaged for the work.

The report says that the farmers are not satisfied that they feel that they would get a better price for their grain but for what happens to it after it leaves their hands. The report also says that the farmers are not getting the fullest return possible for their product.

The Committee on Agriculture at Ottawa, which has been discussing the grain question for weeks, particularly grading and mixing, will receive this report of the Saskatchewan Commission, and some of its recommendations at least will doubtless be included in their report to Parliament and result in legislation that will better protect the interests of the farmers and remove some of the cause of complaint.—Manitoba Free Press.

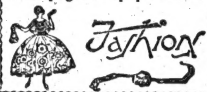

### Solved Housing Problem

Missouri College Student Finds Moveable Home Very Convenient. John Davenport, of Mercer, Mo., wanted to go to college but didn't have the money to buy room rent, so he built his own home and moved it to Trenton so that he could attend junior college there. When he has completed his two-year course he will move his little house to Columbia and finish his college education at the University.

When Davenport wants to "move" he pulls twenty-five bolts and the house is ready to be packed on a truck. He can rebuild in six hours. He plans to settle outside the city limits, or wherever he can find the cheapest site. The house is a one-room affair, heated by a little coal stove. John cooks his own meals on a three-burner oil stove.

He gets his supplies from the store-room of home-canned vegetables and fruits at home. He uses his Ford car to transport the food. The windows are large and neatly curtained. The furniture is adequate, but meagre. The little shelter is electrically lighted.

### Winnipeg Newspaper Union

### THE CHIC SPORTS TYPE

The chic sports dress of feather-weight woolen in grey tones, uses black bone buttons to emphasize diagonal line of bodice belted at normal waistline. The skirt has plaits each side of centre, forming box-pleat to carry out vertical line. Style No. 461 can be had in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42 inches bust. Checked silk in red and white gingham pattern is ultra-smart for now and later for resort. A navy blue silk crepe with dots of chartruese shade is sportive and wearable. Plain lipstick red silk crepe, printed cotton foulard in foliage green tones, navy blue wool crepe and angora, wool jersey in almond green will make up attractively for all-around wear. In the 36-inch size, 4½ yards of 40-inch material is required. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully. We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cute designs for the kiddies.

### How To Order Patterns

CAPTAIN E. GILLAM

who for many years has been piloting vessels of the B.C. Coast Steamship service, in and around the west coast, has been transferred to captain of the Princess Norah, newest ship in that particular service. He first took the bridge of the Norah when the Vice-regal party were guests of the Canadian Pacific Railway on a four-day cruise up the west coast of Vancouver Island.

### Peace River Land For Homesteading

Former Forest Reserve Near B.C. Boundary To Be Thrown Open

About 6,000 homesteads or approximately 1,600,000 acres in the Grande Prairie District, Peace River, Alberta, and in the Peace River Block in British Columbia will shortly be thrown open for entry, according to information reaching the Colonization Department of the Canadian National Railways here. This area includes land formerly held as forestry reserves lying between the sixth meridian and the British Columbia boundary line and bounded on the north by the south line of township 51 and on the south by the Wapiti River. An additional area will also be surveyed and thrown open to homesteading. It is expected that entry may be made for some of these lands by about April 15th.

Canada, with one tenth of the world's coal deposits, is in a favorable position, according to Sir Arthur Dugan, head of the British mission to Australia on Empire Trade.

The Girl: "What is your opinion of those girls who imitate men?" The Man: "They're idiots." The Girl: "The imitation is perfect, eh?"

### KING AND QUEEN AT BOGNOR

During a band concert given in front of Craigwell House, near Bognor, the King took occasion to walk down to the seavall to say a few words to the crowd collected there. The loud cheers that greeted him were interspersed with shouted good wishes for his further recovery. That both the King and Queen were delighted by the welcome accorded them may be surmised from the smiles seen in this picture which is one of the first to show the King walking after his long illness.

### Forty Million Hens

The Enormous Production Of Eggs In Canada

Canadian poultry flocks are estimated to include about forty million hens from which the enormous egg production of the country is obtained. By actual test many of these hens lay very few eggs or none at all, while many others make creditable records by producing upwards of three hundred eggs in a year. The use of the trap nest is throwing much light on the actual performance of hens.

For nine years the Department of Agriculture at Ottawa has been operating a policy known as Record of Performance for Poultry, whereby yearly egg laying records have been kept for an increasing number of birds. Since the work began 162,875 birds had been trap nested up to the end of November, last year. The work has been increasing from year to year until 288 flock owners entered birds last year. This was an increase of thirty-six breeders and 5,593 birds over the previous year.

The birds when entered are numbered with leg bands, and those that lay 150 eggs or over, qualify for Record of Performance certificates, those that lay 225 eggs or over, qualify for advanced certificates. In either case the eggs must weigh not less than two ounces each, and have been laid within a twelve month period. Through the distribution of eggs and breeding stock from the Record of Performance flocks, the egg laying qualities of the flocks of the country are being built up. The gain thus made is regarded as almost clear gain because production is increased through the necessity of increasing the number of hens kept.

The report of the Record of Performance work carried on by the live stock branch of the Department of Agriculture, at Ottawa, for last year is an interesting document and one of great value to egg farmers who may be looking for hatching eggs or breeding stock with which to improve their flocks. This report for last year, numbered 8, is available at the Publications Branch of the Department of Agriculture, at Ottawa.

### A Lesson In Honesty

A little boy had been reported to his father for stealing apples from the stall outside a fruiterer's shop, and the parent was pointing out the evils of theft.

"My boy," he said, "you must have known that it is dishonest to steal. And, in any case, didn't your conscience tell you the man was watching?"

Boss: "I suppose you've noticed we have a dozen rather pretty stenographers here?" Applicant: "Er—no, sir." Boss: "Get out—I won't hire a liar."

## Number Of Titled Canadians Is Found To Be Now Approaching Vanishing Point

### The Problem Of Weeds

Weeds Drive Farms Into Abandonment In Some Sections

Farm weeds have for many years menaced the growing of farm crops. Indeed there are parts of Canada in both the older settled districts of Ontario and the prairie lands of the West where weeds have become so prevalent as to drive farms into abandonment. To study the question of weeds from an economic standpoint, the division of botany of the experimental farms have conducted a survey over most of Eastern Canada, including the province of Ontario, and has made a report of the work accomplished in the report of the Dominion Botanist for 1927. In all a little more than 600 species of weedy and poisonous plants have been discovered and their habitat located. Fifty of the worst of these are listed in the report, which is published by the Department of Agriculture, at Ottawa, in the order of their prevalence. In concluding his report on the weed survey, the Dominion botanist points out that even in the newer sections of the country weeds have been found to be a limiting factor in crop production, justifying strong measures of control to avoid increasing trouble in future years.

### Making Scientific Hay

Another Use To Which Electricity Is Being Directed

Making hay without sunshine is one of the 200 uses of electricity developed by Borlase Matthews, pioneer in the application of electricity to the uses of agriculture. He has an "electro farm" of 600 acres in Sussex, England, and intends launching a scheme for rural electrification of Lincolnshire over an area of 1,280 square miles, with a capital of \$5,000,000 for which he has been granted a special order by the electricity commission.

Matthews is convinced that the farmers of Lincolnshire are keen to develop the use of electricity, examples of which he quotes as electric threshing, electric plowing, electric churning and use of ultra-violet rays for poultry and pigs.

### Muskox Sanctuary

15,000 Acres Set Aside To Preserve Almost Extinct Species

A 15,000 acre sanctuary for the almost extinct muskox is being mapped out in the Thelon territory, east of Great Slave Lake by W. H. Goare, explorer of the North West Territories, and Warden J. A. Knox, of Fort Smith. They have already completed an examination and survey of the southern portion of the proposed preserve having begun this work last April. Muskox have been seen in the district, so Mr. Goare reports, and also large herds of caribou.

### Record Price For Calf

Boy Sells Calf At Calgary Spring Livestock Show For \$2,820

A record price was established at the recent Calgary spring live stock show when the first calf in the boys' and girls' calf feeding competition sold for three dollars a pound. This calf, an Aberdeen Angus, shown by Harold Richardson, of Bowden, Alberta, was an outstanding winner in his class. It was purchased by a Calgary butcher, and at a weight of 940 pounds, brought its young owner the handsome return of \$2,820.

### The Retort Counts

For years a bitter feud had existed between the Browns and the Robinsons. The trouble started through the depredations of Brown's cat, and had grown so fixed an affair that neither party ever dreamed of "making it up." One day, however, Brown sent his maid next door with a peace-making note for Mrs. Robinson, which read:

"Mr. Brown sends his compliments to Mr. Robinson, and begs to say that his old cat died this morning." Robinson's reply was bitter: "Mr. Robinson is sorry to hear of Mr. Brown's trouble, but he had not heard that Mrs. Brown was ill."

Angry Passenger—What good are the figures set down in these railway time tables?

Genial Stationmaster—Why, if it weren't for them figures we'd have no way of findin' out how late the trains are.

Nitroglycerine, the powerful explosive, is also one of the most potent heart stimulants known.

The number of titled Canadians is gradually diminishing. Slowly and inexorably time is rounding off the work which the Canadian parliament began in the spring of 1918, and eventually, save for descendants of the few hereditary peers resident in this country, a generation in the not remote future will see Canada completely divested of men upon whom the sovereign had conferred titular distinctions.

Knighthood has not flowered in the Dominion for more than 10 years. And only a few weeks ago the House of Commons gave emphasis again to their resolve that within the lifetime of the present parliament at least, there was little prospect of Canada's return to titles.

In 1918 Canada was represented in the peerage by eight persons; of baronets and knights there were in all 95. Since then 19 titles have been conferred on soldiers and military administrators, bringing the total to 113. In the present year of grace Canada's representation among the peers of the realm has been reduced to five barons; there are eight baronets and 71 knights—a total of 84 and a diminution of 29 in the past decade.

These figures are recalled by the recent debate in the House of Commons when the effort was made to reopen the question of titles. C. H. Cahan, Conservative member for St. Lawrence-St. George, Montreal, sponsored a resolution which would have had the whole matter made the subject of enquiry by a parliamentary committee. Explaining his purpose, Mr. Cahan said it was desirable to remove the anomaly which arose from the fact that while in 1918 parliament banned the bestowal of titles on Canadians by His Britannic Majesty the same prohibition did not extend to foreign sovereigns. Out of this had developed the curious situation of alien monarchs exercising with respect to Canadians a prerogative denied to King George himself.

Mr. Cahan's resolution had the support of Premier W. L. Mackenzie King and Hon. R. B. Bennett, leader of the opposition. But in spite of this the rank and file of the House of Commons voted overwhelmingly against it and for the time being the "status quo" was maintained.

The abolition of titles in Canada was one of the first offerings of the Union government, following the braid election of 1917. It was on April 3, 1918, that W. F. Nickle, Union member for Kingston, first introduced his famous resolution praying that "His Majesty may hereafter be graciously pleased to refrain from conferring hereditary titles upon his subjects domiciled or living in Canada." Extreme democrats were dissatisfied with this, they thought the resolution was not sufficiently watertight. A champion arose in the person of the late P. L. Richardson, another Unionist from Springfield, Man., better known as "Fighting Bob" of the Winnipeg Tribune. Mr. Richardson moved to eliminate the word "hereditary," thus placing a ban on titles of any sort.

It was at this stage that the then Prime Minister, Sir Robert Borden, intervened. To the amazement of the House of Commons, he announced that on March 25—two weeks prior to the introduction of the Nickle resolution—the government had passed an order-in-council which had been submitted to the British Colonial Secretary. This requested "that no honor or titular distinction (saving those granted in recognition of military service during the present war or ordinarily bestowed by the sovereign 'proprio motu') shall be conferred upon a subject of His Majesty resident in Canada, except with the approval and advice of the Prime Minister of Canada."

Sir Robert made the matter one of confidence. The debate was warm, for many arose to defend this ancient institution. One of its severest critics, however, was Sir William Laurier himself. The aged Liberal chieftain said: "I am quite prepared if we can do it without any disrespect to the Crowns of England, to bring our titles to the marketplace and make a bonfire of them."

She—I have, something, dear, would like to speak to you about. He—I'm glad of that. As a rule you want to speak of something you haven't got.

Farmer A—Have you finished plowing the ten-acre field?

Farmer hand—Yes.

Farmer A—Then you can attend to the harrowing details.

"You are top of your class, so tell me what that is?" "It is a capital S." Pages Gales, Yverdon.

FOR the first time in motor-car history, you can have all these big-car characteristics without paying big-car prices:—

## EVERY MOTORIST SHOULD READ THIS

THE VEHICLES AND HIGHWAY  
TRAFFIC ACT (1924) AMEND-  
MENT ACT, 1929.

No person shall drive a motor vehicle on a highway unless he has a driver's, dealer's, or chauffeur's license. A person over the age of fifteen years shall not be deemed to act in contravention of this Act if while driving a motor vehicle he is accompanied by a person sitting beside him who is the holder of a driver's license and is engaged in teaching the first named to drive.

The Minister may refuse a driver's or chauffeur's license unless he is satisfied of the physical and other competency of the applicant to drive without endangering the safety of the public.

Every person driving a motor vehicle shall carry his license with him and shall produce it when demanded by any Peace Officer or Inspector.

Any Police Magistrate or Justice of the Peace who convicts any person of an offence under this Act, who is the holder of a driver's license, may suspend for such a time as he thinks fit, or cancel, such driver's license and transmit same to the Minister with a report, and every such suspension or cancellation shall remain in force until the Minister makes an Order shortening the term of suspension or annulling the cancellation.

The fee payable for any driver's license or any duplicate, shall be fifty cents.

Every driver's license shall remain in force until suspended or cancelled, and all other licenses shall remain in force unless otherwise suspended or cancelled, until the First day of January following the year for which they were issued.

No driver's license shall be issued to any person under the age of sixteen years.

Notwithstanding any other provisions of this Act any person who—

(a) habitually resides without the Province; and

(b) has complied with the laws of his place of residence as to licensing of drivers and as to the registration of motor vehicles; and

(c) carries such certificate as is required by the laws of his place of residence—

may be granted a permit to use his motor vehicle within the Province for a period of, or for periods together, amounting to three months in any year, and shall not be required to have a driver's license under this Act or to register his motor vehicle provided he applies for such permit to a license issuer or a member of the Alberta Provincial Police within seven days of his entering the Province.

Every person to whom a permit is granted shall keep displayed upon the windshield of his motor vehicle, a sticker of the nature prescribed by the Minister.

All vehicles used by a liveryman in his business shall be insured by an insurance of such an amount and covering such risks as the Minister may prescribe.

The license of any liveryman who fails to keep his vehicle insured or to comply with any other conditions prescribed by the Minister may be cancelled or suspended.

No liveryman who carries on business as such in any city or town shall employ any person as a chauffeur of a passenger vehicle unless such person holds a permit, in writing, authorizing him to act as such by the Mayor of the city or town, as the case may be, and the issuing of such permit shall be in the uncontrolled discretion of the Mayor. The Mayor may cancel any permit issued by him at any time.

Every liveryman who carries on business as such in any city or town shall not later than the third day of each month deliver to the Mayor a list of all chauffeurs employed by him in driving passenger vehicles.

Every liveryman who carries on business as such in any city or town who employs any person as a chauffeur of a passenger vehicle who is not the holder of a valid and subsisting permit, or who continues to employ any person after being notified that such person's permit has been cancelled shall be guilty of an offence and liable on summary conviction to a fine of not less than Twenty dollars or more than One Hundred dollars and costs and in default of payment to imprisonment for a period of not more than six months.

Any person who carries on a business as a liveryman without a valid and subsisting liveryman's license shall be guilty of an offence and liable on summary conviction to a fine of not less than Twenty dollars nor more than One Hundred dollars and

costs and in default of payment to imprisonment for a period of not more than six months.

No person shall permit anyone who is not a holder of a driver's or chauffeur's license to drive his motor vehicle.

The provisions as to the insurance of his vehicle by a liveryman and as to his employment of any person as a chauffeur of a passenger vehicle, unless such person is the holder of a permit, and as to the taking out of a liveryman's license, shall come into force upon the day upon which this Act is assented to and the remainder of the Act shall come into force the First day of July, 1929.

NEWS ITEMS**

Two coaches were set out on the siding here on Friday evening, a baggage and passenger coach containing 14 families. They remained in the coach over night and on Saturday the Hudson Bay people were busy taking them to their new homes on the Hudson Bay quarters where houses were erected last Fall. There was some excitement during the day as there were three runaways, but luckily, no one was hurt.

The Jamieson Construction Co., are loading seven cars of gravel a day for work in Edmonton.

The steam shovel is back in the pit again, and they are hauling gravel for ballast for the track between here and Jarro.

The brown hoist was in on Saturday and loaded some gravel to be used at Bruce.

The Ladies Aid have had a cement floor put in the basement of the church. Mr. Horner of Vegreville has done the work.

Mr. Frank Williams has had an addition put on his garage.

Mr. E. C. Williams has his contract nearly completed for the school south west of town.

Mr. E. C. Williams has a number of orders for brush breakers and tractors.

Mr. Tom Woods has purchased a stubble burner from E. C. Williams.

Mr. Claude Wachter has gone to work on the C. N. R. on the pile driver with his father, Mr. B. Wachter.

They spent Sunday at their home here. Miss Ella Cornack who was clerking for Mr. Ferries, has accepted a position with Messrs. Third and Ansell.

Mr. and Mrs. P. J. Wagness returned from the Coast a couple of weeks ago. Mrs. Wagness' health is much improved.

Mr. and Mrs. Lund who were looking after Mr. Wagness place while he was away have returned to their home in Viking.

School was closed for one week here on account of an outbreak of scarlet fever. There are a few families quarantined at present but we understand all are getting along nicely.

The play put on by the Ladies Aid a few weeks ago, proved very suc-

cessful. They took in \$64.25.

Mr. and Mrs. Trenhale of Vegreville spent Sunday with Mr. and Mrs. D. Corbett.

Mr. and Mrs. Albert Hughes from near Wainwright, called on Mr. and Mrs. William Anderson on Sunday.

Mrs. William Anderson on Sunday.

Mrs. Hawkesworth of Vermilion is spending some time with her daughter Mrs. Jack Neale and helping care for her granddaughter, Ellen Neale who is ill with scarlet fever.

Mr. Frank Murray has a nurse from Edmonton caring for his wife and daughter Alice who are ill with scarlet fever.

At the last meeting of the Women's Institute Mrs. William Anderson was elected as a delegate to the Convention to be held in Edmonton on May 28th.

Mr. V. A. Justik is having an addition built on to his house.

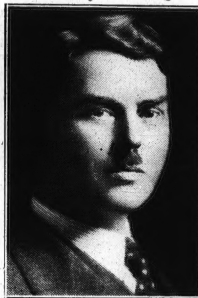

**FLIES OR BABIES, WHICH?**

The above arresting title to a brief but very telling little pamphlet issued by the Metropolitan Life Insurance Co., gives a very real meaning to the "Clean Up" week which is being urged on all communities at this season.

Filth and garbage of all kinds accumulate during the winter months. With the coming of the warm days the house fly appears. It is born in filth, lives in filth and when not busy on butter, milk, preserves or the baby's bottles, is feeding in filth.

It is estimated that the flies are responsible for more deaths than any single known disease. Babies are in particular prey since the infantile diseases are carried largely by the pest. Get rid of it by cleaning up filth and garbage. Make a habit of burning all refuse. Give it no chance to breed. Screen doors and windows at the first hint of warm weather. Two flies at the beginning of the season will be responsible if allowed to live for millions of other flies, they breed so rapidly. So clean up, burn up and screen doors and windows. Is it to be flies or babies? The choice is yours.

For literature on the summer care of babies send to the Canadian Red Cross Society, 407 Civic Block, Edmonton, Alta.

MR. WM. McDONNELL

Who has been appointed Superintendent of Alberta Branches of the Bank of Montreal.

The Bank of Montreal announces the appointment of Mr. Wm. McDonnell as Superintendent of Alberta Branches, with headquarters at Calgary, to succeed Mr. C. W. Chesterion who has been appointed Superintendent of Branches in British Columbia. Mr. McDonnell, who was born and educated at Peterboro, Ontario, entered the service of the Bank at Montreal in 1899, and after experience at other branches in Eastern Canada was transferred to Winnipeg in 1906. A few years later he became Accountant at Moose Jaw, and after holding a similar position at Port Arthur returned as Manager to Moose Jaw in 1912. From 1917 to 1923 he was Assistant Manager in Winnipeg, and in the latter year was promoted to the position of Inspector of Branches in the Western Division, in which capacity he was in intimate touch with business activities throughout the three Prairie Provinces. For the past four years Mr. McDonnell has held the position of Assistant District Superintendent of Ontario Branches.

Overheard in the alley: "We must invite Mr. and Mrs. .... to dinner soon." "Certainly. Do you know what day they cannot come?"

"No girl ever made a fool out of me," declared a local fellow to his best girl. "I suppose it came naturally," she replied.

# BEAUTIFY CANADA

Clean Up, Paint Up, Keep It Up --- Increases the Value of Your Property

## WORLD HAPPENINGS BRIEFLY TOLD

The government proposes to create a national park in Manitoba, it will be in the Riding Mountains and will embrace 1,000,000 acres.

After half a century as sergeant-at-arms in the Manitoba legislature, John McDougall, 83, died April 30, at his home at Lockport, Man.

The King ordered conferred on General Bramwell Booth, deposed commander-in-chief of the Salvation Army, the Order of Companion of Honor.

Where the Ashburton-Webster treaty was signed eighty-seven years ago, a plaque was unveiled recently by Kiwanis International as a memorial to the friendship between Canada and the United States.

Iyemasa Tokugawa, former commander of the Japanese embassy at London, and grandson of the last of the Tokugawa shoguns, has been appointed to the newly created post of minister of the Japanese Empire in Canada.

A shipment of \$8,000,000 of gold from Germany arrived recently at New York on the liner "Hamburg." Since March, when the present movement of gold started, \$30,023,000 of the metal has been sent from Berlin to New York.

Professor J. B. Sachse, of the University of Alberta, Edmonton, is the newly chosen president of the Canadian Society of Technical Agriculture. The officers for 1929-30 take over their duties at the annual convention to be held in Winnipeg in June.

**Requisite On the Farm.**—Every farmer and stock-raiser should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a really remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

### Manitoba Highways

A start on the construction of Manitoba's section of the Trans-Canada Highway eastward to the Ontario boundary, will be made this year, it was announced in the Legislature, when supplementary estimates were before the House for approval. An item of \$200,000 for a start on the highway was passed. The cost when completed will be approximately \$500,000, it was stated.

## What Will you do

## When your Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million babies are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhoea checked. A vegetable product, a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use; in emergencies, or for everyday ailments. Any hour of the day or night that baby becomes fretful, or restless, Castoria was never more popular with mothers than it is today. Every druggist has it.

**Fletcher's CASTORIA**

W. N. U. 1784

## Paint Pointers

In finishing wood it is important that the groundwork be sandpapered and thoroughly dusted off before the next coat is applied. Dusting is indispensable to good workmanship, particularly in the case of woodwork, furniture and automobiles, where a high gloss is the aim of the finisher, and this holds good whether the work is to be finished in varnish, enamel, color varnish, or even in a high gloss oil paint. Without the dust, even when other conditions are perfect, work will present a blotched, dirty looking, and easily apparent, and the higher the gloss in the finishing product, the more this condition will be reflected. "Dusting off" does not mean that the dust is to be scattered from any given surface with a rag or anything that comes handy. It simply means that a soft bristle, pointed duster is to be used and that the dust is not only to be removed from the surface under treatment, but also from every surface in close proximity to the scene of operations.

In the application of paint to iron work, the first thing to be done is to get the surface absolutely free from rust. A mere scratch with a knife will suffice, he sufficient, a good scrubbing with a wire scratch brush is more effective. The success of varnishing does not depend altogether on the quality of the varnish itself. The conditions necessary to ensure satisfactory work are numerous, but the most important are cleanliness of brushes and surroundings, and a warm temperature.

The first coat on new plaster should be very thin in order that the paint may penetrate and harden the surface so as to form a key for the following coat. Abundance of time should be allowed between each coat.

Spilt, curled up shingles, even when re-stained or painted, represent a depreciation far in excess of the cost of periodical painting.

The easiest and quickest way to stir up a can of paint is to pour off the liquid from the top, stir up the pigment in the bottom of the can with a fairly wide paddle, then pour back the liquid and stir it all up well — with a circular and upward motion of the paddle. For perfect mixing, complete the operation by pouring the paint back and forth, several times, from one container into another.

It is always best to bed, wash, glass is perfectly level on its flat side, hence does not lie flat against the wood. The bedding putty should be soft enough to run freely from under the thumb.

Whenever possible, shingles, for at least three-quarters of their length, should be slipped in a vat of turpentine and after they are laid a finishing coat applied with a brush.

Duster brushes should be washed with soap and water before being used on white woodwork, otherwise they are apt to discolor the purity of the ground.

Chamois skins for finishing work should never be thrown on the floor nor allowed to come in contact with gritty substances.

Raw linseed oil and turpentine, mixed, is an infinitely better medium than water for keeping brushes soft. Spots of flat wall paint from ceilings or walls should never be allowed to dry on the woodwork. They should be wiped off at the end of the morning's work, and again at the end of the day, with a rag soaked in turpentine. A little labor expended in this way will save hours of hard work in the finishing of the floors and woodwork.

The time allowed for drying between coats depends on conditions of temperature, ventilation, and surface. This does not mean that a paint manufacturer who declares on his label that "forty-eight hours should elapse between coats is merely guessing. Not at all! The product has undoubtedly been tested and manufactured to act in this time schedule under fair conditions, but unfortunately, it is likely to be applied under conditions that are decidedly unfair — such as a cold room, no ventilation, greasy or smoky surface — and in such cases the scheduled time of forty-eight hours ceases to possess any value as a reliable guide. As a matter of fact the correct time, under fair conditions, might be four days — or a week!

When the preceding coat is so dry that there is absolutely no suspicion

of "lackiness" under a firm pressure of the fingers or hand, the second may be safely applied.

## Choosing Upholstery and Drapery Fabrics

There is a far wider range of choice in upholstery materials than is generally utilized. Selections of serviceable and attractive materials are not limited to the tapestries, velvets and velvets in which stock pieces of over-stuffed furniture are usually found in the shops.

The following fabrics are suggested for upholstery purposes:

**Wool Rep:** This is a material which comes in 50-inch width in a selection of staple colors. It is serviceable and inexpensive.

**Corduroy:** Upholstery corduroy is material that should be used far more widely than it is at present for upholstery purposes. It is attractive, inexpensive and durable.

**Cretones, Printed Linens and Printed Mohairs:** Cretones, printed linens and printed mohairs are highly decorative upholstery materials.

**Monks Cloth and Denim:** These are cotton materials which are attractive and give good service. They are excellent for recovering old pieces of overstuffed furniture where expense is an item.

Cretones are universally popular for draperies, and not without reason. They are light, cleanly and colorful and can be purchased in a very wide selection of designs, colorings and prices. In living rooms and dining rooms, stronger or richer colorings are preferable to the more delicate floral patterns suitable for bedrooms.

Toile de Jouy patterns of classic restraint and both bold and restrained floral patterns, provide the characteristic decorative note for Queen Anne furniture.

Cord cloth in cretomes is to be avoided, but the other extreme of work of characterless color must be guarded against. Conventionalized designs in striking decorative effects are less hackneyed than the regulation floral patterns. Naturalistic flowers in an all-over design are not as distinctive as floral types on a broken background.

Printed linens are usually hand-blocked and are softer in outline and color. The hand printing gives a rich texture to the fabric. They are more expensive than domestic cretomes, but pay in the end, as they retain their colorfulness and color. Linen is a more interesting and distinctive fabric than cotton.

Gingham, chambray and saten provide effective window drapes for country houses and children's rooms. A border of contrasting color adds to their decorative effect.

Plain silks are usually selected for draperies when there is already sufficient design in the room. They are the best selection for a room with a figured wall paper of pronounced pattern. They are also a good selection in a room where the floor covering or upholstery materials have a conspicuous design. Thin silks of the pongee, china silk or gauze variety are particularly pleasing in the daytime when unlined.

Taffeta is delightful in bedrooms with enameled furniture. It comes in a wide range of exquisite pastel colorings and effective stripes.

Bedrooms call for a type of drapery fabric which is different from the family rooms of the house.

Dotted swiss, organza, voile and cross-barred batiste are most attractive bedroom fabrics. They can be used for both bedspread and window curtains, and if selected in a pastel color, rather than white or cream, no additional window drapery is necessary. Tinted gauze glass curtains add a colorful note to a bedroom. Wool embroidery or applique provides decorative interest for plain materials.

**Tangled Titles**

Fletcher: "How did the jury come out in that Army Post case?"

Barker: "They disagreed on the question of titles."

Fletcher: "What do you mean?"

Barker: "They said they couldn't find a Colonel in a Major crime arising from a General riot occasioned by a Private quarrel!"

Kindly Wife: "Still I don't think you should be too discouraged about your driving, George. Look at all the telegraph poles you passed safely before you hit this one."

## Repainting Wooden Buildings

It is always good policy to re-paint a building before the previous coat has fallen into a state of decay. If the work is done while the old coat is in good condition and the same value of paint is used ("value" referring not to color but to the paint's degree of lightness or darkness), one coat is usually sufficient when a good house paint is employed.

If, however, the old coat has been permitted to fall into a state of decay, it will be necessary, in order to put the surface into good condition, to use two and sometimes even three coats of paint.

If, owing to the use of a cheap cheap primer, or because the previous painting was applied on damp wood, or because of any other malpractice, the old coat has become hopelessly blistered and is peeling, the only safe course is to remove it entirely. If this is not done, the new coat no matter how good your materials may be, and no matter how excellently you may have done the work, will be lifted off by the continued peeling and cracking of the old undercoat.

The best way to remove paint from large surfaces is to burn it off with a blow torch. This method consists in softening the paint with intense heat, generated by the torch, and scraping it off while still hot with a metal scraper. It is advisable to employ an experienced man for this work.

After the old coat has been entirely removed and the surface of the wood sand-papered and dusted off in the usual way, the building should be painted in the same manner as directed for new wooden buildings.

Usually an old coat which is in fair condition, will merely require treatment with a coarse wire brush and sander in order to remove the few loose particles adhering to the surface. It should then be dusted off and given two coats of paint.

The first coat is prepared in the following manner. If the surface seems unusually porous, a half-gallon of pure raw linseed oil and a pint of turpentine should be added to each gallon of paint. If the surface is hard and smooth, omit the oil but add a pint of turpentine to a gallon of paint.

The second coat of paint should be applied as it comes from the can. Both these coats should be applied with the same care as is given to a new job and the general directions for painting new wooden buildings should be read and followed.

## Staining Shingle Roofs

Use a good shingle stain. Before beginning the work, see that the shingles are dry and clean.

As a matter of economy it is better to dip shingles in bulk before laying them. Dip them in and out as quickly as possible and wipe them off by rubbing across a stick covered with burlap. Then allow them to drain off in a drip trough. They should be stained for only about two-thirds of their length. Stain the exposed ends only.

Paint is best for old, weather-beaten shingles, blackened by age and exposure. The priming coat should be prepared as directed for house painting and should be brushed out well with careful attention to the ends of the shingles. The second and finishing coat should be applied as it comes from the can.

## A Reasonable Question

An eager looking urchin approached a man hurrying towards the railway station. "Carry your bag, sir?" he asked. "No," snapped the man. "I'll carry it all the way for threepence," said the boy. "I tell you I don't want it carried," snapped the man. "Don't you?" "No, no!" Whereupon the lad broke into a quick trot to keep up with his victim's hasty strides, as he asked, in innocent curiosity, "Then what are you carrying it for?"

## Ukpeop Of Railway

Half a million cubic yards of ballast, 150 miles of fencing, 55,000 tons of rails, and more than a million creosoted sleepers are used annually by the London and North-Eastern Railway to maintain their 7,000 miles of line.

London has more than 20,000 bob-ties—English policemen.

## Floor Coverings

Next to the walls and ceiling, the floor presents the largest area in the room, and consequently its covering should be well thought out and carefully selected.

The floor, as well as the ceiling, is a plane which holds the four walls of the room together. While the walls form the background for furnishings, the floor is the foundation. A good foundation is always essential to any well-designed decorative plan.

Linoleum floors are attractive, resilient, shock-absorbing, durable, warm in winter and cool in summer. Waxing linoleum gives it a softer, smoother texture and preserves it indefinitely.

For the average room, a rug with a plain ground and a neat border, or neat all-over pattern of floor covering, is more desirable than one with a decided pattern.

Large and bold patterns have a decided tendency to make the room look smaller. The patterns are apt to jump and as the ideal floor covering furnishes the foundation for furnishings it must be made to keep its place on the floor. When there is a great deal of furniture, a boldly figured floor covering gives a confused appearance to the room and destroys its restful, harmonious appearance.

Boldly patterned rugs usually come in strong colorings, and this also makes them exceedingly difficult to fit into a soft, harmonious color scheme.

Figured floor coverings, however, have their place. In rooms which are sparsely furnished or where the furniture is of a light and simple type, they add to the "furnished" appearance of the room. That is, they take away bareness. In large rooms which are sparsely furnished, figured rugs are particularly advantageous.

In dining rooms, it is usually preferable to have a figured floor covering, as it does not show soil or stain so quickly as plain floor coverings. In bedrooms where the furniture is of a light type, a figured floor covering adds to the comfortable appearance of the room. In sleeping porches, enclosed porches or breakfast rooms, where the furniture is not usually plentiful, either tile effects or a bold figured floor covering adds greatly to the finished appearance of the room.

It is a wise plan when a highly figured floor covering is used to use hangings or upholstery material in a plain color or in a neat and unobtrusive all-over pattern. On the other hand, if the hangings or upholstery is figured, plain floor coverings are best. Too many figured patterns in a room create the feeling of motion and the effect produced lacks restfulness. Too many plain surfaces, on the other hand, tend to make a room look bare and uninteresting. Some figured material should be used in every room, but it should be balanced with a proportionate quantity of plain material or surfaces without design.

In selecting a figured pattern, the colorings must be considered first. For general use, strong or vivid colors should never be selected. Small all-over patterns are, in most cases, preferable to large sprawling ones. The tone of the floor covering should always be deeper than that of the walls or furniture, as the ground we walk on is always darker than the sky or the landscape. Light-colored floor coverings are exceedingly difficult to fit into a harmonious scheme.

## Irish Magistrate: "The defendant swears he was perfectly sober."

Policeman: "He was absolutely intoxicated. He had been perfectly sober he would have known he was drunk and not made a disturbance."

GAULTS LIMITED  
Winnipeg Edmonton

## Laying and Preserving Linoleum

The ideal method of laying linoleum is to cement it over deadening felt paper, which should first be pasted to the floor with any standard make of linoleum paste. This overcomes bulging and stretching, or opening up of seams and cracks along the edges. It also prevents water from getting underneath the linoleum and in that way prolongs the life of the flooring.

Linoleum laid in this manner becomes a solid, permanent, elastic floor. It cannot bulge or stretch. The felt paper foundation absorbs all expansion or contraction that may take place in the wood floor and makes the linoleum more durable. It also allows the linoleum to be removed without difficulty or damage should the necessity arise.

The most approved manner of treating linoleum has been found to be waxing. The wax should be carefully rubbed on and the floor polished like hardwood. An occasional treatment of this kind will keep the linoleum in an immaculate condition.

A damp cloth removes all soil from the waxed linoleum and it will be found that scrubbing is entirely unnecessary.

In case there should be obstinate marks of soil on waxed linoleum, they can be removed with a pad of fine steel wool without scratching or damaging the linoleum itself.

Varnishing is best for printed linoleum, as it brightens and preserves the original pattern and makes the linoleum easier to clean. A coat of good varnish or white shellac will also preserve cork carpet.

## Many Varieties Of Bananas

Although most of us know only two varieties of bananas by sight, there are numerous others, the Philippine Islands claiming fifty-seven, Malay, thirteen, Spain, ten, and Burma, eight.

Australia supplies one-fifth of the world's supply of wool.

## DIAMOND "A" HOUSE PAINT

MY FIRST CHOICE because it's Absolutely Pure—Covers More—Looks Better—LASTS LONGER

Kyanize

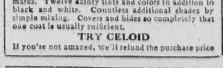

Celoid Finish

Tints of Amazing Charm—For tinting furniture, walls and woodwork, this tinting-glass, waterproof enamel brushed on with ease, dry overnight, produces a velvety "rubbed" effect without rubbing.

Paints, stains, washes, linoleum, leather, brass, marble, etc. Twelve different shades in black, white, and colors. Additional shades by simple mixing. Covers and lasts so completely that one coat is usually sufficient.

TRY CELOID

If you're not amazed, we'll refund the purchase price

Hot or Cold! It Matters Not

Alabastine mixes readily with hot or cold water and remains fluid no matter how long it stands. Will not stiffen. Use a soft bristle brush.

CHURCH'S HOT OR COLD WATER

Alabastine

## Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

### CHAPTER XVIII.—Continued

The rush of wings sounded high in the air as wild ducks passed in swift flight on their yearly pilgrimage to the south. Occasionally a flock would lower in gradually narrowing circles to land with a splash in the restful waters of the lake, then to stretch tired wings, the while bobbing their heads and quacking contentedly. Flocks of geese passed in wedge-shaped formation, their honking coming faintly from a dizzy height. A flock of Arctic swans, skimming so low that the crisp rustle of their wings could be heard, landed in the centre of the lake with a great commotion. There with their beautiful necks proudly arched they floated like white ghosts throughout the night. The red and yellow leaves, like gaudy curtains draped the deciduous trees. The wild crab-apple and high-bush cranberry hung frozen on the naked branches. The sun was surrounded by a ring and shone weakly through a misty haze. The unmistakable breath of the north wind was in the air.

Old John took the traps down from the loft and oiled them. A patch was found needed to a worn moccasin, and new laces were inserted in his snowshoes. "Winter's comin', ol' timer, and we're going to have a heavy fall of snow," he mused to himself. For two days Nature gave warning, then on the second night the storm came.

A roaring wind came blowing from the north, lashing the waters of the lake to foam, tearing at Donald's cabin with the strength of invisible giant hands; and howling through the forest with shrieking walls. Gust came upon gust with increasing strength, and in the short lulls could be heard the swish of the sleety snow against the windows.

The big trees creaked as they swayed in the gale, and with a loud groan, as if in mortal pain, a huge forest monarch, as its roots gave way, fell crushing down on a new world. The wind whirled, the smaller snow had given the earth a blanket of white that was eye-blinking in its brilliancy under the bright morning sun. The keen frost had locked the lake tight under a coating of clear ice.

### CHAPTER XIX.

With a fond hope that he would receive word of the Wainwrights, Donald eagerly awaited the coming of each mail; but after a month of dis-

appointment he became less sanguine, and threw himself desperately into work in a vain attempt to allay his heartache.

During the long winter the mill continued operations in spite of heavy snows, the roads being kept open by the continual traffic.

Jagel came twice with gay parties to enjoy the skiing and snowshoeing. She found that she loved Donald, and decided that any uncertainty as to his past was as nothing when weighed against her need of him.

On one occasion, when Janet mentioned his "wood-sprite," she saw a rept look in his eyes and caught her breath sharply. The very thought of losing him stabbed her like a knife-thrust.

With the coming of March a change came over the earth. Winter shivered and reluctantly loosed his hold. Gentle showers and warm winds from the south honey-combed the ice on the lake; snowdrifts faded away, and the frost-bound soil gave forth earthy odours to replace the keen smell of the snow.

One morning a song sparrow under Donald's window sent out its sweet "chip-chip-chee-chee-wig-wig," and from the top of a swaying alder a wren croaked his joy of living in full-throated tones that said that spring was here. Stirred by the warmth and cleaving buds, the frogs came from the mud, where they had lain dormant all winter, and with swelling throats and bulging cheeks sent out their cheerful "k'kun, k'chunk."

Mists covered the lake, and in an open spot near the mouth of the creek a flock of ducks disported themselves happily. The sun grew higher with every dawn, giving strength each day until its warming energy spread the beauty of colour and fragrance over all.

One afternoon, when the air pulsed with the song of birds, and newly-opened buds perfumed the atmosphere with perfume, Donald walked up the hill to Wainwright's cabin.

Scores of birds, returned from their yearly pilgrimage to the south, flitted about the deserted buildings, but there was no golden-haired girl with a welcoming smile to greet them. Rivulets from the melting snows had gouged channels in the once neatly kept plots of wild flowers, and the roof of one of the smaller huts had fallen in.

Donald pushed open the door of the main building and entered. The air felt chill and dank. He experienced a quick depression of spirits, and his heart ached as he surveyed the gloomy interior. He shivered as a pack-rat scuttled across the floor and disappeared under Connie's bunk. With a heavy heart he returned to the bright sunshine, sat down, and gave himself over to a period of melancholy retrospection.

His mind went back to his first meeting with Connie, then on through the many thrilling episodes of the summer. She belonged to high mountains, to deep forest glades, to companionship with the birds, flowers and trees of God's wild outdoors. She would never be content with the bad air and the cramped conventions of cities. He suddenly remembered the words she had used that day by the stream near her nest in the cedars. He seemed to hear her sweet, hesitating voice with its pleasant English accent.

"And," she had said, "six months out of every year I'd come right here and live in these mountains."

"She'll come back," he said aloud. The thought cheered him. "She'll come back," he repeated to Andy that night.

"I hope so, Donnie."

A week later, Robert Rennie, accompanied by his daughter, arrived at Summit Lake. The owner was in high spirits. "I am pleased with the excellent work you are doing here," he said, as he placed a hand in friendly fashion on Donald's arm. "The mill is a success—a huge success—and I know who deserves the greater share of the credit!" He smiled up at Donald. "Next week," he went on, "an event of importance to the lumber industry takes place. The Government is to entertain a admit that I was proud when the chief forester called at my office to party of Eastern lumbermen. I will tell me that this mill had been selected as the most modern and efficient in the Province, and requested permission to bring the Government's guests here."

"They are to stay here a few days, but you will not be inconvenienced, as the train will be equipped with dining and sleeping-cars, loaned for the occasion by the C.P.R. I will come with them, but I am leaving it to you to arrange for their entertainment and to see that everything is in tip-top shape for their arrival."

As Robert Rennie was leaving the next morning he turned to Donald. "By the way," he said casually, "I have decided to add a yearly bonus to your salary, based on the profits of this mill. I have made it retro-active from the time you took charge." Before Donald had time to express his thanks his employer swung aboard the train.

Expressing a desire to be at the lake on the arrival of the excursion, Janet remained.

On the day set for the visit of the Eastern capitalists the sun rose in radiant promise of a typical June day. The leaves were now fully matured, and the willows and maples rustled under the soft, warm winds. All the valley was clothed in a verdant, quivering, gently pulsating life.

The long train drew slowly into the depot. Its occupants poured out until the small platform was filled to overflowing. Robert Rennie, accompanied by a slender man dressed in a tweed suit and cap, pushed his way through the crowd to Donald's side.

Donald greeted his employer, then glanced casually at Mr. Rennie's companion. His eyes widened. "Mr. Wainwright!" he gasped.

Wainwright laughed happily as he wrung Donald's hand.

"It is—Con—Miss Wainwright with you?" stammered Donald.

Then he saw her.

(To Be Continued.)

### Solitude Reduces Sentence

Many Criminals in France Prefer Isolation For This Reason

In France's modern prison at Fresnes-Bungia, 1250 white-masked prisoners live in absolute silence. They neither see each other's faces or hear their voices. From the moment a metal number is hung around his neck, the prisoner is required to wear a white hood whenever he leaves his cell and he may not speak to his fellows. He sees the face of his guard from time to time, but no other, unless he is sent to the hospital or to the warden for discipline. Alone in his cell, he works eight hours a day, but good will and skill enable him to reduce the time to six hours and the money he earns enables him to buy small comforts. The government receives thirty-two cents a day from contractors for each prisoner's work and gives from three-tenths to half the money to the prisoner. The prisoner never sees the money till he leaves, but half of it is placed to his immediate credit for his little expenses. Yet in spite of all that many criminals ask to be sent here because the solitude entitles them to a reduction of one-fourth of their sentence.

Horace—What is a bachelor, Daddy?  
His Father—A bachelor, my boy, is a man who looks before he leaps—and then doesn't leap!

### Scientist Makes New Discovery

Says Milk Treated By Wireless Waves Keeps Sweet For Weeks

An Austrian scientist claims to have discovered a method by which milk treated by wireless waves of short length can be kept sweet for three or four weeks. The new "wireless milk" is produced by passing an intense beam of short waves through the liquid. This is said to kill all germs which cause milk to turn. The milk itself is not heated by this treatment, and does not acquire a "cooked" taste.

### Little Helps For This Week

"Consider the lilies of the field."—Matthew vi. 28.

Consider then the lilies, O heart of mine, today; They neither toil nor spin to win Their beautiful array; I would that thou couldst lead a life So fearless, sweet as they.

—Margaret E. Sangster.

There is a wise meaning and a gracious design in every tint of the lily's adornment and every curve of its grace. Its symmetry is a type and proof of the divine justice. Its life is co-ordinated, and keeps true with the sublime motions of the heavens; and its structure and uses are full of the profound teachings of the unsearchable God. And if God thus care for an individual flower which, today is, and tomorrow is cast into the oven, how much more will He care for an individual human being whom He has made in His own image, and upon whose life He has made such momentous issues to depend.—Hugh MacMillan.

### Auction Sale Of School Lands

Nearly \$400,000 was realized by the auctioning of school lands, all within a radius of forty miles of Regina, the other day. The number of quarter sections sold were 196 out of 381 listed for sale, and the average price realized was \$1250, hence the total amounting to \$398,431.00.

### Potash In British Columbia

Large Scale Fertilizer Industry To Supply the Needs Of Prairie Farmers

"Substantial fortunes are awaiting the prospectors who unearth some of the potash believed to be stored away in the mountains of British Columbia," said George H. Kilburn, of the Consolidated Mining and Smelting Corporation, which is working out a large-scale fertilizer industry at Trail to supply the needs of the Prairie Provinces. Mr. Kilburn mentioned that the company is making free analysis of potash specimens submitted so as to assist prospectors.

### GOOD IN EVERY WAY

Baby's Own Tablets Banish Babyhood and Childhood Ailments

A medicine that all mothers praise—one good in every way—one that will quickly banish the minor ills of babyhood and childhood is the medicine to keep in the medicine chest; to always have on hand in case of emergency. Such a medicine is Baby's Own Tablets—they are helpful at all times. They are a mild but thorough laxative, which by regulating the bowels and stomach banish colds and simple fevers; correct constipation and indigestion, relieve colic and diarrhoea and make the cutting of teeth easy.

Thousands of mothers use no other medicine for their little ones. Among them is Mrs. J. H. Bromley, Westmeath, Ont., who writes:—"I have four children and whenever any of them are ill I always use Baby's Own Tablets and have found them good in every way. I would not be without the Tablets and would also like your little booklet 'Care of the Baby in Health and Sickness.'"

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Saskatchewan Famous For Clays

Saskatchewan has a greater variety of clays, in larger quantities and of the higher grades, than any other Canadian province, and will, without doubt, become the centre of a very important ceramic industry. The clays of Saskatchewan have been the subject of special investigations by the Department of Mines, Ottawa.

There are more than 1,024,000 persons by the name of Johnson in the United States.

The average horn will blow 156,000 times before wearing out.

### Your Skin In SPRING Needs ZAMBUK

Quickly soothes irritation & clears away pimples, rash, blotches, freckles, etc.

### Saving Seven Seconds

Many Motorists In Attempting It Have Lost Their Lives

It has been established that seven seconds is the average length of time it takes a fast railroad train to get by a level crossing. That isn't a long period of time to the living, but it has meant eternity to many thousands of motorists who couldn't spare the seven seconds. They risked their lives to save them. Most everybody, in motoring across the country, has on two or three occasions hurried to cross a railroad track ahead of a train, so that they wouldn't have to wait. Some others waited the seven seconds so highly they paid with their lives for them.

An Oil That Is Famous.—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far ahead enough to attest its excellence, for in all these countries it is on sale and in demand.

The Man: "Whether marriage is a failure or not, I certainly think that some are more fortunate than others in what they get."

His Wife: "Yes, I quite agree. For instance, you got me, but I only got you!"

### Aching Feet

## FLU Germs Breed In the Throat.

First, Appear As A Common Cold, But Gain Tremendous Headway In Six Hours

SOME SIMPLE PRECAUTIONS AGAINST INFLUENZA

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of Influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerville. Half a teaspoonful of Nerville in water makes a most efficient gargle. The germ-killing properties of Nerville quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure to rub the neck and chest with Nerville. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminatory organs, and the system of disease-breeding germs. This combination treatment of Nerville and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

## Men's Wear

### Mercury Combinations

No. 77 the popular flat knit Merino Combinations. Cotton with a small percentage of wool. Medium weight. It is the all-round Spring, Summer and Fall Underwear for Alberta.

Natural Shade, Sizes 34-44 for ..... \$1.95
